PROJECT

**A Resource
for Physicians**

What is the IMPACC Project??

The Autism Program, at The Hope Institute for Children and Families, was awarded a HRSA/MCHB grant for capacity building and system development. One subset of the project is to promote developmental screenings and integrated care

through engagement and support of primary care physicians.

With a regional emphasis, three

Health Service Facilitators (HSF) are working collaboratively with multiple state agencies and local TAP Centers to provide physicians with necessary tools and resources to improve care and services.

What is The Autism Program?

TAP SERVICE NETWORK
TRAINING & SERVICE CENTERS

A network of service providers across the state, comprised of agencies and universities whose missions include system development and evidence-based service provision.

What can a Health Services Facilitator offer YOU??

- ∇ **FREE ICAAP** Early Autism Detection and Referral Training (1.5 CMEs)
- ∇ **FREE AAP** Physician Autism Toolkit
- ∇ **FREE** First Signs Kit for Autism
- ∇ **FREE** TAP Family Care Kit
- ∇ **FREE** TAP resource directory
- ∇ **FREE** Access to video Telehealth Autism Trainings and webinars

Doctors heal the best when they care the most...thank you for your compassionate care
